ALM Implementation for Automation Leader

Background

Our client had SAP Solution Manager installed and utilized to a very minimum extent. Their SAP documentation was all over the place. This poses a huge challenge to build a complete SAP Solution and utilize the Solution Manager functions effectively.

ATG

ATG proposed and implemented the SAP Solution Manager / Application Life Cycle Management tool with Change Request Management and STMS setup in Solution Manager. SAP Solution Manager provided the necessary tools around the implementation, Operational and Optimization aspects for their Application Life Cycle.

Solutions Implemented

- SAPSolution Manager/ALM tool for Automation Leader
- Setup for ChaRMfor SAP Solution Manager 7.1
- STMS Setup in SolMan
- Security & Authorization in ChaRMsetup
- ChaRMConfiguration
- ASCENDENTMigration with SAP Solution Manager

Outcome

- 100% success with security audit and compliance
- 85% of SAP Solution documents
